

product focus

Our Leaf Pro XL gutter protection system is top choice for a state of the art leaf-shedding design with nose-forward channels and heavy duty aluminum construction.

Advanced Engineering

The Leaf Pro XL series fits any 4 to 6 inch standard K-Style or Half-Round gutter systems in aluminum or copper. The two tier panel design makes installation to all angles or roof pitches quick and easy. Leaf Pro XL is engineered from heavy gauge aluminum with baked on enamel finish and available in 12 colors and copper.

High Performance Enhancements

Leaf Pro XL design is based on the scientific principles of water adhesion. The patent pending V-notch channel and nose forward channel optimize rainwater collection even during the heaviest of rain storms. Leaf Pro XL comes with a lifetime material warranty (See warranty details online at www.egutter.com).

Easy Installation

Installation is a breeze! See our online instructions for more details. Leaf Pro XL installs directly to the top front edge all aluminum gutters with simple low profile self-tap zip-type screw. The only tools required are a pair of aviation snips, a cordless drill, a 1/4" hex driver bit, and the proper ladder. Order securely online or call 800-661-2836 ext. 250.
