

Our durable Gutter Cover System provides a long term solution against all types of leaves and debris clogging typical rain gutters.

The ultimate all aluminum

Gutter Cover fits any existing 5 and 6 inch gutter system. The heavy all aluminum system comes complete with clips and hardware for a secure long term fit to your existing gutters. No need to rehang your gutters. Each kit contains 100 feet or 25 four foot panels, 55 aluminum clips, 65 stainless steel screws and complete installation guidelines.

Satisfaction without the high price

Gutter Cover cost a fraction of similar systems like Gutter Helmet®, LeafGuard®, and Gutter Topper®. Every Gutter Cover comes with a 20-year finish warranty and eliminates hazardous gutter cleaning.

How the system works

Using the principles of surface tension, as rainwater moves across the Gutter Cover panel, it follows the curved surface into the gutter. Leaves, needles, seedlings, and other debris are shed away allowing a more efficient gutter system and eliminating the need for routine cleaning.

Installation

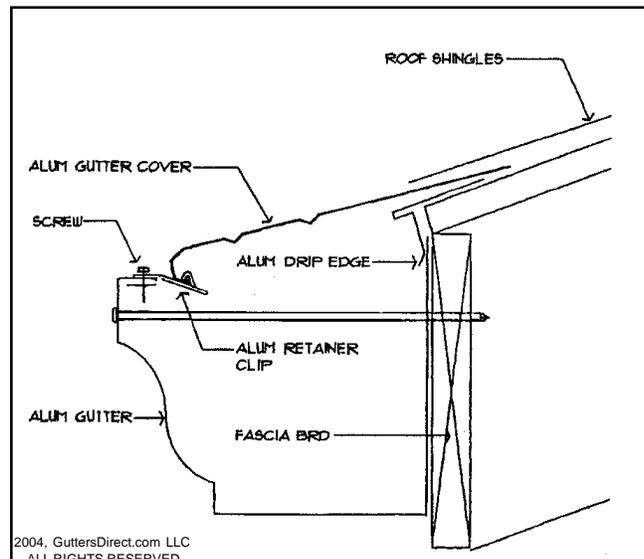

Each panel install directly under top layer of shingle and attaches to front lip of K Style gutter through a retainer clip and stainless steel screw. For more, go to www.egutter.com/
